

# Carry the resistance into the imperialist centres!

## Fight ECB and G7, fight imperialism!

Billions of persons all over the world suffer from the imperialist barbarity. In order to safeguard their economic and military predominance the monopolist major corporations and their states created numerous institutions and international organizations as IMF, World Bank, NATO, EU and G7, in which they concentrate their power.

During the next months the imperialists will gather even twice at their summit meetings in Germany. First they plan to solemnly open the new headquarter of the European Central Bank (ECB) on the 18th of march, which particularly serves the German and French monopolies as an instrument of exploitation in the countries of Southern and Eastern Europe. Besides representatives of the G7-States (USA, Great Britain, Canada, Italy, France, Japan and Germany) want to meet on 7th and 8th of June 2015 in a luxury hotel in the Bavarian Alps to coordinate their economical and military ambitions and sound out the options they have.

The struggle against ECB, EU and their exploitative policy is primarily a struggle against the German imperialism, that is together with the French imperialism the decisive force and greatest profiteer of the joint European policy. In its interest the people of South and East Europe are pushed into profound poverty, unemployment and misery.

The role the troika of ECB, EU-Commission and IMF currently plays for the imperialists in the plundering of Europe can be compared to the role the G7 play for the western imperialists in the plundering of the whole world.

The G7 are responsible for the sorrow of millions. During the last years they have provoked bloody wars in Afghanistan, Iraq, Georgia, Libya, Syria and now also in Ukraine. Many more countries were forced into profound crisis and dependency by their exploitative and oppressive policy. The exclusion of Russia from the G7 shows that the inner-imperialist contradictions also continue to aggravate and that this kind of alliances today still maintain their importance on world level and make our resolute resistance necessary!

The increasingly open and hard attacks and neoliberal programs of the imperialist bourgeois against the working class, the working masses and oppressed nations have given rise to broader and broader resistance. In Tunis, Cairo, Istanbul, Madrid, Lisbon, Brussels, Tuzla, Frankfurt and London millions took to the streets against imperialist aggression and capitalist exploitation and defended their rights against the capitalist dictatorship in a militant way.

The struggles of workers, youth, women, retirees, unemployed in the oppressed and dependent countries and imperialist centres have to be united in regional and international anti-imperialist fighting fronts. We share a common enemy, so let's fight them together!

Let's fight the imperialist summit of international capital in the spirit of the proletarian internationalism. No matter, where they fortify themselves, let's fight imperialism and capitalist barbarity.

## Resist the ECB opening! To the assault on the G7 summit!

### Long live international solidarity!
