

FIGHT NATO! FIGHT IMPERIALISM! FOR SOCIALISM!

NATO stands for war, armament, atomic threat, protectorates, massacres, torture, rape, murder of civilian population and counterinsurgency around the globe.

The war in Afghanistan is a typical example of NATO-Warfare. Nothing else than the distribution of spheres of interest, the quest for world domination in competition with other powers such as Russia, China and even between the NATO members themselves are at stake. Every bandit wants a piece of the cake.

There won't be peace on this planet under the reign of imperialism. That's the "massage" the military alliance NATO conveys. The end of the Cold War has been declared as the beginning of the era of peace. And this is what humanity faces today; worldwide military armament has expanded to unimaginable dimensions: The sea, the air, the outer space, the earth are armed with arsenals of weapons capable of wiping out every living creature. NATO is a giant in the military struggle for world hegemony.

At the frontline "our" German imperialism as big power is involved. She has instigated two world wars in the 20th century. Yet today her forces are in action worldwide as NATO- and EU-Forces.

Hoping for NATO and other military alliances to dissolve by themselves, if the people want it, is an illusion. NATO and all other imperialist alliances are part of the imperialist system. Peace can only be achieved if this system is destroyed, if the economic structure is radically changed. Opposed to the principle of maximization of profits and the exploitation of people by people, the socialist society has declared the needs of the working class as its guiding principle. This change, indeed this revolution won't be taking place peacefully, it won't be decided upon in any ballot. It won't be discussed in the bourgeois parliament. It will be achieved in the streets, militantly, in the international struggle of all exploited and oppressed people.

**Fight the palaces-
Peace to the huts!
Fight NATO and the
imperialist system!**
